

Renewable energy consultant, solar and storage.

We're excited to be hiring an experienced **Senior Renewable Energy Consultant** with a focus on the Italian solar and storage sector. The position is based in Italy, with flexibility on location. You will be joining a growing and dynamic international team, already well established in the Solar sector in UK, France, Spain and Portugal and growing fast in Italy. You will be supported by our wider international team, already experienced in Wind, Solar, Green Hydrogen and Energy Storage in Europe, bringing expertise to local teams in renewable energy projects.

Salary: A competitive basic salary related to your experience, plus pension scheme, annual profit share and route into company ownership.

Location: Milan, Italy, working in our Italian office. Remote working possible after initial office based period.

Hours: Normal office hours with a healthy level of flexibility. Preference for 5 days per week but will consider candidates who would prefer part-time with a minimum of 4 days per week.

Everoze is different:

Everoze is different, we are employee owned. We're more than just a technical and commercial consultancy, specialising in renewables, storage, green hydrogen and wider energy flexibility. We live our values. We're passionate about accelerating the transition to a decarbonised energy system. We have no bosses or formal hierarchy. We are free to pursue opportunities that deliver our strategy. We take ownership of our own development and support one another along the way. Our pay is transparent and set by our peers. We, the employees, own the company and we share a portion of our profits equally.

We're OK with being different. Everoze isn't for everyone. But it might just be for you... Find out more on our web: <https://everoze.com/jobs>

What you will be doing:

Your work will be mainly technical and commercial consultancy services to solar photovoltaic (PV) projects, Battery Energy Storage System projects and in hybrid projects. You will be advising developers, operators, lenders and investors in the Italian markets as well as supporting other geographies like Spain, Portugal, France and the UK. Specific activities will include:

- Leading technical and commercial due diligence for PV, BESS and hybrid projects/ portfolios – both as a project director, project manager and in supporting roles. Specifically:
 - Assessment of risks which could result in a deviation from the project or portfolio financial model, particularly lower energy yield, delays to the project timeline, higher Capex and Opex, and then to propose relevant mitigation measures.
 - Assessed areas would typically cover: land securement, administrative authorisations, environmental constraints, project design, tariff scheme, grid connection, construction and operation contracts, project timeline,
- Construction and operational monitoring.
- Bespoke owner's engineer services.
- Strategic work.
- Business development to build client relationships and win work.
- Managing multiple projects with internal and external resources.
- Ownership of budget and profitability of projects.

We would like to hear from you if you meet the following requirements:

We are looking for someone who is motivated to take the next step in their renewables consulting career by building on their experience and network to become a highly recognised solar consultant with a reputation for delivering high quality work, meeting client expectations and a strong techno/commercial understanding of projects.

We understand that some great applicants may not excel across all of the above criteria. We are willing to support people who have a great fit with the Everoze culture, who are passionate about what we do,

and who have great strengths in a sub-set of the above fields. If you love the role and can demonstrate your ability to apply your strengths and adapt to new fields, we encourage you to apply.

Ethos

- You are already, or you are motivated to become, recognised as a senior solar consultant (ideally with some storage expertise) with a reputation for delivering high quality work, adding value to clients and possessing a solid understanding of complex technical and commercial interactions on projects;
- You share our core beliefs of entrepreneurship, partnership and quality;
- You are excited to work in an open, non-hierarchical environment;
- You are self-motivated and will take advantage of the autonomy to shape your own career;
- You want to use your skills to change our energy system for the better;
- You are comfortable being either a project manager or a team member.

Essential skills and qualifications

- Engineering degree, Physics, Mathematics or similar
- Native/fluent in Italian and English.
- Minimum 10 years' experience in consultancy, including:
 - Knowledge of technical due diligence process and specific technical review areas for solar PV.
 - Capable of reviewing of typical renewable energy sector construction and operation contracts.
 - Capable of determining commercial implications of technical risks for different transactions (equity / debt etc.).
- Good understanding of the Italian local requirements and country specific topics (i.e. grid, land, environmental, permits, hybridization with other technologies, etc) in **solar**.
- Demonstrating good consultancy skills, for example:
 - Comfortable adapting work and priorities to meet deadlines / clients' needs.
 - Enjoys working as part of a team and supporting colleagues.
 - Able to write clear, concise and accurate reports in English.
 - Able to manage concurrent & different tasks and prioritise workload.
 - Track record of developing and building lasting client relationships.
- Willingness to travel as part of project work.
- Self-driven and able to work at a commercial pace to meet our clients needs

Nice-to-haves, any of the following:

- Experience in other renewable technologies (in particular: Storage, Hybridization, Wind) .
- Owner's engineering, construction monitoring or asset management experience.
- Expertise in Spanish and/or Portuguese markets or in other European and worldwide markets.
- Additional language skills (Spanish and/or Portuguese).

How to apply

Everoze embraces diversity and equal opportunity. We are committed to building a team that represents a variety of backgrounds, perspectives, and skills. For this reason, we are only accepting applications for this position made through the BeApplied platform which is designed to avoid any unconscious bias. You will be asked to answer 3-5 short questions designed to give you the opportunity to demonstrate the core skills we are looking for. These will be reviewed anonymously, before reviewing your CV, your details or even your name, and the highest scoring applicants will be invited for interview.

To make an application please follow this link: <https://app.beapplied.com/apply/85zintzreo>

By submitting your application, you agree that Everoze will process the application for the recruitment process, in line with the privacy policy accessible via this link:
