Expanding balcony power plants cost-effectively

SOL•THOR, my-PV's DC Power Manager for water heating, wins German Design Award 2025

The photovoltaic heating expert my-PV has simulated the use of its new DC Power Manager SOL•THOR with 2 to 3 photovoltaic modules. The result? Thanks to my-PV's control unit, a two-person household can cover between 34 and 50 percent of its hot water requirements per year with just three solar modules. my-PV will soon receive the German Design Award 2025 for this self-sufficient solution.
