30.04.2025

Munich, April 29, 2025 – Voltara will present its intelligent home energy system for the first time at this year's Intersolar. The new European provider combines cutting-edge software innovation with decades of expertise in energy-efficient building technology and electrical installation. The result is a forward-looking energy system built on intelligently networked, decentralized prosumers. Voltara works closely with regional installation companies – from planning to implementation.
