

ENERPARC booth A4, 280: Focus on dialog and discussion

Hamburg / Munich, May 2025 - This year, ENERPARC AG will have its own booth at Intersolar Europe in Munich for the first time. As one of Europe's leading solar park investors, constructors and operators, we want to show responsibility in our role as an active co-designer of the energy transition at Europe's largest trade fair for solar energy and offer a platform for dialog.

Political change, regulatory challenges, social discourse - we need to talk

Especially now, at a time of profound political change in Germany, Europe and the world, it is more important than ever to enter into discussions with all players in the energy market. The transformation of our energy system is progressing - but there is still a lot to do. At the ENERPARC booth (A4, 280), we are creating space for open exchange: about sustainable business models, the necessary political framework, social acceptance and technological progress.

Top-class supporting program - no registration required, just drop by

We cordially invite all fair visitors to take part in our exciting panel program. In five rounds of talks, we want to discuss the current key topics in our industry - with leading representatives from politics, science and business. Registration is not required - just come along.

Supporting program at the ENERPARC stand (A4.280):

May 7, 1:30 - 2:15 p.m.

✦ *Financeable Business Models for Renewables after EEG? (panel in English)*

Discussion with Gerard Reid, Tim Koenemann, Julius Guntermann, Marco Langone and others
Moderation: Michael Fuhs (pv magazine)

May 7, 4:15 - 5:00 p.m.

✦ *The new coalition is in place. The solar industry's demands on politicians (panel in German)*

With Dr. Simone Peter, Robert Busch, Walburga Hemetsberger, Dr. Fokke Peters
Moderation: Fabian Zuber (Reiner Lemoine Foundation)

May 8, 10:00 - 10:45 a.m.

✦ *Social hurdles: How do we reach the masses for change? (panel in German)*

With Prof. Dr. Volker Quaschning, Prof. Dr. Christian Stöcker, Darya Sotoodeh, Stefan Müller
Moderation: Anna Gauto (Table.Briefings)

May 8, 4:15 - 5:00 p.m.

✦ *Electricity market design 2.0: What do we need for a sensible energy economy? (panel in German)*

With Prof. Dr. Thorsten Müller, Dr. Tim Meyer, Dr. Wolf-Peter Schill, Arved von Harpe
Moderation: Sandra Enkhardt (pv magazine)

May 9, 10:00 - 10:45 a.m.

✦ *Start-up scene: What's happening on the market for new ideas in the field of renewable energies? (panel in German)*

With Felix Krause, Dr. Ilan Momber, Katharina Beitz, Stefan Müller
Moderation: Dr. Holger Klärner (McKinsey & Company)

We look forward to your visit and a lively, constructive exchange.

About ENERPARC:

The international specialist for solar power plants in the megawatt segment is active as a developer, constructor, operator and investor of large-scale solar power plants. Founded in Hamburg in 2008 as an unlisted stock corporation, the ENERPARC Group now employs over 600 people in its core markets of Germany, Spain, France, Portugal, India and Australia. To date, ENERPARC has successfully connected more than 700 solar plants with an output of over 4.7 GW to the grid worldwide - around 3.5 GW of which are its own solar power plants - and has become one of the largest independent power producers for solar energy in Europe. ENERPARC's goal is to develop a total of 10 GW of PV systems and 1 GW of large-scale battery storage for its own portfolio and a further 10 GW of systems and 1 GW of storage for third-party solar portfolios worldwide by 2030.
