

AE Solar Launches New Production Facility in Turkey through Strategic Partnership with SDG Solar

Manisa, Turkey — [Date] — Germany-based AE Solar, a world-leading solar panel manufacturer, is proud to announce the opening of a new production facility in Turkey. This move is made possible through a strategic partnership with Turkey-based SDG Solar, under the newly established AE Solar San. Tic. A.Ş., marking a significant milestone for the solar energy sector in the region.

Starting January 2025, AE Solar's Tier 1 certified TopCon and MonoPerc solar panels will be manufactured at the Manisa Organized Industrial Zone (OIZ), with an impressive annual production capacity of **750 MW**.

This collaboration not only brings the excellence of German engineering to the Turkish market but is also poised to make a strong contribution to local employment and the broader renewable energy transition in the region.

Founded in 2003 in Germany, AE Solar is a globally recognized manufacturer with production facilities across Europe and Asia, and a product footprint in over 100 countries. As a leader in innovative solar solutions, AE Solar continues to expand its reach and now operates in more than 90 countries worldwide.
