

IBC SOLAR and Bosch join forces in energy and climate technology

Bad Staffelstein / Germany, June 22, 2026 – IBC SOLAR, a leading provider of photovoltaic solutions with a focus on wholesale distribution, proprietary product and system solutions, and international project business, and Bosch Home Comfort have entered into a strategic partnership. As a first step, IBC SOLAR is expanding its portfolio to include selected Bosch air conditioning systems, creating new opportunities for installation partners to offer integrated energy solutions from a single source.

Through this collaboration, IBC SOLAR is responding to the growing demand for holistic solutions in both renovation and new-build projects. More and more homeowners are planning photovoltaic systems, energy storage, heating, and air conditioning as part of one interconnected energy system. By partnering with Bosch, IBC SOLAR strengthens its position as a trusted partner for the energy transition in the building sector and supports PV installation companies in strategically expanding their range of services.

At the start of the partnership, IBC SOLAR will add selected Bosch split air conditioning systems to its product portfolio. These products complement the company's existing heating portfolio and lay the foundation for a gradual expansion of the collaboration in the years ahead.

"Our customers are increasingly evolving into comprehensive energy specialists. They combine photovoltaics, energy storage, electrical engineering, heating, and air conditioning technologies within a single project. With Bosch, we have a strong partner at our side that stands for quality, reliability, and comprehensive service. Together, we are creating the conditions needed to support our premium partners in this development as effectively as possible," says Patrik Danz, CSO at IBC SOLAR.

In addition to a broad product portfolio, Bosch contributes extensive training, planning, and service offerings to the partnership. This gives IBC SOLAR's premium partners access to additional expertise and support throughout the entire project lifecycle.

"The energy transition in the building sector can only succeed through intelligent and interconnected solutions. Our collaboration with IBC SOLAR combines Bosch's expertise in building and climate technology with IBC SOLAR's longstanding experience in solar energy. Together, we create added value for both installers and end customers while driving the integration of modern energy technologies forward," says Tino Hirsch, Head of Marketing and Sales, Bosch Home Comfort Germany.

At Intersolar Europe 2026, IBC SOLAR will present the newly added Bosch air conditioning systems and the opportunities they create for integrated energy solutions. Solar installers visiting the IBC SOLAR booth will be able to learn more about the new Bosch systems and discover how photovoltaics, air conditioning, and other energy technologies can be combined into efficient overall solutions. In doing so, both

companies are creating the foundation for additional business opportunities in the growing renovation and modernization market.

IBC SOLAR's experts look forward to engaging in active dialogue at Intersolar Europe from June 23 to 25, 2026, in Hall A4, Booth A4.470 and A4.570.

About IBC SOLAR

IBC SOLAR is a leading provider of photovoltaic and energy storage solutions, operating worldwide across three core business areas: wholesale distribution of photovoltaic components, the development and manufacturing of proprietary products and system solutions, and international project business.

In wholesale, IBC SOLAR distributes a manufacturer-independent portfolio of components for solar power generation and storage, complemented by technical advisory services. In its own products segment, the company develops and manufactures, under its own brand, PV mounting systems, modules, and complete system solutions. In the project business, IBC SOLAR delivers large-scale photovoltaic projects, covering the entire value chain from project development and planning to construction, as well as operation and management of the systems.

IBC SOLAR was founded in 1982 in Bad Staffelstein, Germany, and is considered a pioneer of the energy transition.

About Bosch Home Comfort

The Bosch heating and air conditioning brand offers sustainable solutions for heating, cooling, and enhanced comfort and well-being throughout the home. Its product portfolio includes efficient, resource-saving, and future-oriented heat pumps, hybrid systems, solar thermal solutions, electric water heaters, air conditioning systems, as well as intelligent energy management solutions, including EV charging stations (wallboxes) for electric mobility. The portfolio is complemented by a comprehensive range of digital tools and services.
